Sarah Zhang

Frontend Developer

sarahz.dev — github.com/sazhang — sarah.hg.zhang@gmail.com

EXPERIENCE

Racket, Remote — *Product Lead*

JANUARY 2022 - PRESENT

○ Lead user experience and interface design for both web and mobile apps—racket.com and Racket iOS app

○ Involved in multiple stages of the product development process from ideation to research to design to release management

Odyssey DAO, Remote — *Design Contributor*

NOVEMBER 2021 - PRESENT

○ Contribute branding and design work for odysseydao.com

○ Collaborate with team leads to build and iterate on pages in Webflow

Racket, Remote — *Frontend Developer*

APRIL 2021 - JANUARY 2022

○ Built core features for racket.com, including feeds, profiles, playlists, leaderboards, search, multiplayer recording studio, and audio DMs, using Ruby on Rails, JavaScript, and third-party APIs and SDKs

○ Designed and developed marketing pages and the applicant and judge experiences for podcash.com, a Ruby on Rails microsite for podcasters to apply for sponsorships

Capiche, Remote — *Frontend Developer*

FEBRUARY 2020 - APRIL 2021

○ For capiche.com, iterated on onboarding, feeds, and profiles, and built notifications, at-mentions, and search interfaces using Ruby on Rails and Javascript

○ Ideated, scoped, and helped execute product wikipedia pages that centralized product info and enabled community-driven editing on capiche.com

○ capiche.com was acquired by Vendr for $1.075 million

○ Designed capiche.fm, a web app that initially supported live broadcasting over phone calls and then evolved into an audio-only live streaming platform with interactive chat and audience participation

○ For capiche.fm, implemented live streaming interfaces, and helped build phone call flow, SMS notifications, and audio clipping features, utilizing Ruby on Rails, JavaScript, and third-party integrations
